

EMMANUEL TIGOUÉ, CISSP

AI Security Engineer | Security Engineering & Agentic Systems

Atlanta, GA | 4048392214 | EmmanuelTigoue@gmail.com | [LinkedIn](#) | [GitHub](#) | [Portfolio](#)

CERTIFICATIONS

CISSP | SecurityX (CASP+) DoD 8140 | SSCP | CCNA | Security+ | Network+ | Eligible for Top Secret Security Clearance

EXPERIENCE

AI Security Engineer | CoreDirective

Atlanta, GA | 09/2025 - Present, 60 hrs/week

- Ran the AI vulnerability management lifecycle against Squire and the OpenClaw skill catalog (prompt injection, jailbreak, leakage, excessive agency, exfiltration). Triaged and remediated **6** high and medium issues with CVSS scoring before launch.
- Authored **57** GRC documents covering NIST 800-53 (**135** controls), HIPAA Security Rule, SOC 2, ISO 27001, NIST AI RMF, ISO 42001, FedRAMP moderate baseline, and **5** IR playbooks with Promptfoo eval harness for continuous control testing.
- Architected Squire, an AI SOC analyst on LangGraph with human in loop approval gates. Cut Datadog alert triage **80%** via pgvector RAG, NeMo Guardrails with GLiNER PII redaction, and Langfuse tracing.
- Operationalized the n8n AI agent platform: **14** workflows across **16** services (Claude, Ollama, OpenClaw) and **20+** secrets, reclaiming **12+** hours per week of manual security ops.
- Eliminated standing admin with Teleport JIT PAM and Keycloak SSO RBAC. Enforced MFA on admin paths, recorded every session for audit, and cut breach blast radius.

IT Security & Operations Manager | Texaco

Atlanta, GA | 03/2022 - 03/2026, 65 hrs/week

- Ran incident response for **3** retail locations. Investigated POS skimmer attempts using Wireshark, tracked credential compromises, and dealt with unauthorized vendor access.
- Wrote an IR runbook with **6** steps that dropped containment time from **8** hours to **90** minutes.
- Deployed Splunk as the SIEM, pulling logs from every endpoint and network device on site. Built correlation rules and response automations that cut detection time from **48** hours to under **4**.
- Hardened Active Directory IAM: enforced GPO baselines, cleared stale accounts, removed standing admin rights, and automated credential rotation. Closed **12 of 14** critical audit findings.
- Tore apart a flat network and rebuilt it as **4** VLANs: POS traffic, back office, guest WiFi, and management. Validated with Nmap. Lateral movement dropped to zero.
- Managed PCI DSS audits and vulnerability management for **45+** endpoints. Ran quarterly Nessus authenticated scans, drove risk based remediation, and kept SAQ docs current with the payment processor.

TECHNICAL SKILLS

Technical Skills: Python, Bash, PowerShell, Linux, AWS, Docker, Terraform, OPA/Rego, Burp Suite, OWASP ZAP, Semgrep

EDUCATION

Georgia State University, J. Mack Robinson College of Business

B.B.A. in Business Economics | 2026

A.S. in Business Administration | 2025
