

USSS Uniformed Division Entrance Exam:

Practice Test 07

30 questions · Maximum difficulty · Mirror + rotation figural · Stadium + hospital observation · Bayes, deontic, and denial-of-antecedent LBR · 2026 UDEE format

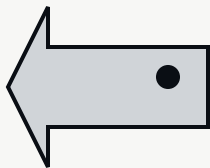

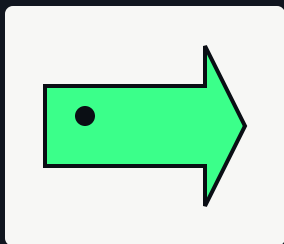

Instructions. Test 07 covers different question patterns than Tests 05 and 06.
Target: 65 minutes total. Pacing:

- **Section A (Figural):** 10 questions in 15 minutes. Expect mirror images, rectangle counting, cube slicing, triple-rule matrices, and multi-hole paper punches.
- **Section B (Observation):** Study Scene 13 for 90 seconds, then Scene 14 for 90 seconds. THEN answer all 10 questions without scrolling back.
- **Section C (LBR):** 10 questions in 30 minutes. Expect "only if" conditionals, Bayes probability, denying the antecedent (new trap), and a four-statement self-referential puzzle.

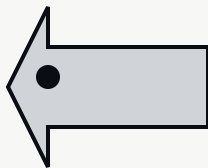

Answer key: Separate file: [answer-key-test-07.html](#). Do not peek until you finish.

SECTION A: Figural Reasoning (1 through 10)

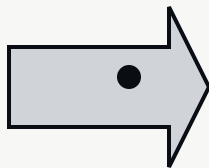

1. The figure on the left is reflected across a VERTICAL axis (left-right mirror). Which option correctly shows the reflected image, including the position of the small black dot?

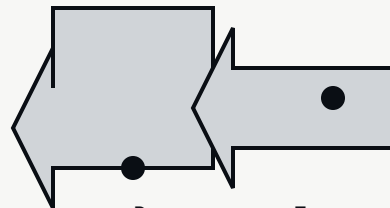

A

B

C

D

E

A. A: arrow points left, dot on the RIGHT side (far from the tip)

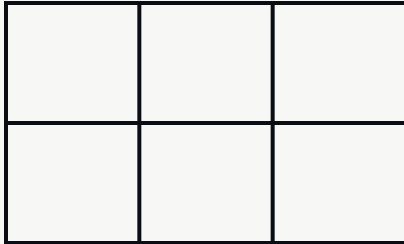

B. B: arrow points left, dot on the LEFT side (near the tip)

C. C: arrow unchanged (points right, dot still on the left)

D. D: arrow points down

E. E: arrow points left, dot near the middle

2. How many RECTANGLES (of any size, including squares) can be traced on the 2-row by 3-column grid below?

A. 6

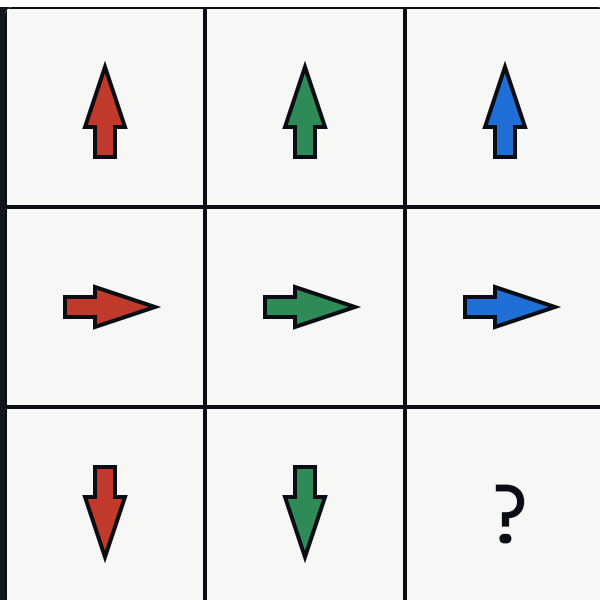

B. 9

C. 12

D. 18

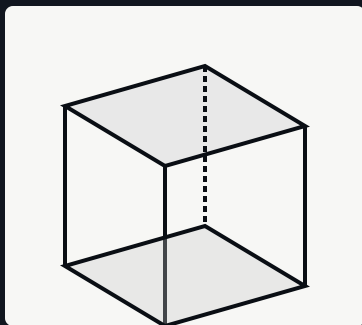

E. 24

3. The 3x3 matrix obeys TWO rules. Rows rotate an arrow (0° , 90° CW, 180°). Columns change color (red, green, blue). Which arrow fills the missing cell at row 3, column 3?

- A. A blue arrow pointing UP
- B. A blue arrow pointing DOWN
- C. A red arrow pointing DOWN
- D. A green arrow pointing DOWN
- E. A blue arrow pointing RIGHT

4. A standard cube has 6 faces, 12 edges, and 8 vertices. How many SPACE DIAGONALS does a cube have? (A space diagonal connects two vertices that do NOT share a face.)

- A. 2
- B. 4
- C. 6
- D. 8

E. 12

5. Find the rule and the missing value.

A. 28

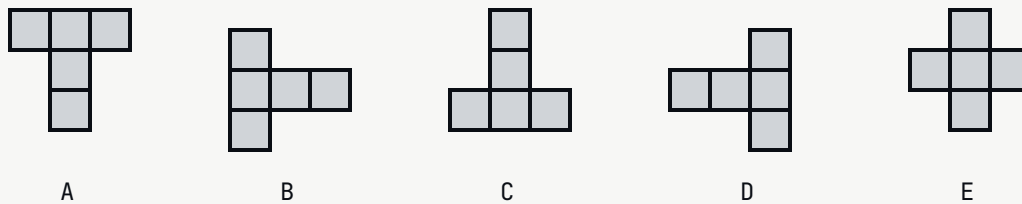

B. 30

C. 34

D. 42

E. 55

6. Four of these five 5-cell figures are the same pentomino piece rotated in the plane. Which figure is a DIFFERENT pentomino entirely (not a rotation of the others)?

A. A

B. B

C. C

D. D

E. E

7. A square sheet of paper is folded in HALF (creating 2 layers), then folded in HALF AGAIN (creating 4 layers). TWO separate holes are then punched through all 4 layers. When the paper is fully unfolded, how many total holes are visible?

A. 2

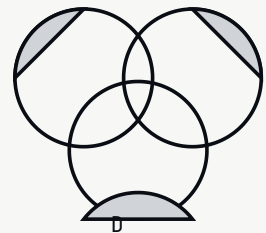

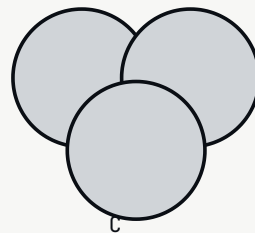

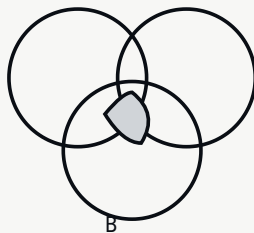

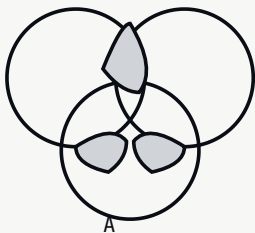

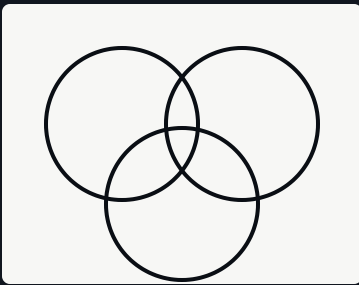

B. 4

C. 6

D. 8

E. 16

8. Three overlapping circles form a Venn-style diagram. Which option correctly shades ONLY the regions that are inside EXACTLY TWO of the three circles (the three pairwise overlaps, EXCLUDING the central triple-overlap)?

A. A: three pairwise lenses are shaded, center triple region empty

B. B: only the center triple overlap is shaded

C. C: all three circles fully shaded

D. D: three outer single-circle arcs shaded

E. None of the options correctly depicts the requested region

9. A radar pointer begins pointing NORTH. Each step, it rotates 45° COUNTER-CLOCKWISE. After exactly 5 steps, in which compass direction does the pointer face?

A. Northeast

B. South

C. Southeast

D. Southwest

E. West

10. Each step, the arrow GROWS slightly AND rotates 45° CLOCKWISE. Which option comes NEXT (step 5)?

A. Same size as step 4, pointing DOWN

B. Larger than step 4, pointing DOWN

C. Larger than step 4, pointing SOUTHWEST

D. Smaller than step 4, pointing DOWN

E. Same size as step 4, pointing SOUTHWEST

SECTION B: Detail Observation with Interference (11 through 20)

Study Scene 13 for 90 seconds, then Scene 14 for 90 seconds back-to-back. THEN answer all 10 questions with both scenes scrolled off-screen.

Scene 13: Stadium Security Perimeter (study 90 seconds)

🕒 First 90 seconds. Memorize every detail.

Scene 14: Hospital ICU Protective Detail (study 90 seconds)

🕒 Second 90 seconds. Memorize. Do NOT scroll back to Scene 13.

⌚ Both scenes studied. Scroll down and answer ALL 10 questions WITHOUT scrolling back up.

11. (Scene 13) What was the event name printed on the red banner across the stadium?

- A. National Bowl 2026
- B. Capital Bowl 2026
- C. Capitol Games 2026
- D. Capital Classic 2026
- E. No banner text was visible

12. (Scene 13) What time did the digital stadium clock display?

- A. 17:32
- B. 18:15
- C. 18:47

D. 19:50

E. 20:08

13. (Scene 13) How many metal detector gates were visible at the security perimeter?

A. 1

B. 2

C. 3

D. 4

E. No metal detectors were visible

14. (Scene 13) What support unit with a handler was positioned between the two gates?

A. A bomb-sniffing dog

B. A mounted police officer

C. A drone operator

D. A tactical response team

E. A K-9 unit was not present

15. (Scene 13) What color vest did the uniformed security guard wear?

A. Orange

B. Bright yellow

C. Dark green

D. Navy blue

E. The guard wore no identifying vest

16. (Scene 14) What was the room number or identifier on the ICU door?

A. ICU-4A

B. ICU-14B

C. ICU-41B

D. Room 1402

E. No room identifier was visible

17. (Scene 14) What time did the analog wall clock display?

A. 1:15 PM

B. 2:30 PM

C. 3:45 PM

D. 6:00 PM

E. No wall clock was visible

18. (Scene 14) How many Secret Service agents were posted at the ICU door?

A. 1

B. 2

C. 3

D. 4

E. No agents were visible

19. (Scene 14) What was the hospital staff member in the corridor pushing?

- A. A wheelchair
- B. A medication cart
- C. A laundry bin
- D. A food tray
- E. The staff member was not pushing anything

20. (Cross-scene) In WHICH scene was a clock displayed, and in what format?

- A. Only Scene 13 had a clock, digital
- B. Only Scene 14 had a clock, analog
- C. Both scenes had clocks: Scene 13 digital (18:47), Scene 14 analog (2:30 PM)
- D. Both scenes had digital clocks
- E. Neither scene had a visible clock

SECTION C: Logic-Based Reasoning (21 through 30)

21. Department policy states: "ONLY incidents occurring in Zone A or Zone B alert Dispatch." On Monday night, Dispatch WAS alerted. Which conclusion MUST follow?

- A. The incident occurred specifically in Zone A.
- B. The incident occurred specifically in Zone B.
- C. The incident occurred in Zone A or Zone B (or both).
- D. The incident occurred OUTSIDE Zones A and B.
- E. Nothing about the incident location can be concluded.

22. Seven items (P, Q, R, S, T, U, V) are placed in positions 1 through 7. Constraints: (1) P is in position 3; (2) Q is immediately after S; (3) T is

before P; (4) U is in position 7; (5) R is NOT in position 1; (6) V is in position 6. Which order satisfies ALL constraints?

A. T, R, P, S, Q, V, U

B. P, T, R, S, Q, V, U

C. T, R, S, Q, P, V, U

D. R, T, P, S, Q, V, U

E. T, R, P, Q, S, V, U

23. Thirty-seven investigations are assigned to exactly five special agents. Every investigation is assigned to exactly one agent. What is the MINIMUM number of investigations the agent with the highest caseload must handle?

A. 6

B. 7

C. 8

D. 9

E. 10

24. Three witnesses are interviewed: Franklin, Garcia, and Hayes. EXACTLY ONE is telling the truth (the other two are lying). Their statements:

- Franklin: "Garcia is lying."
- Garcia: "Hayes is lying."
- Hayes: "Both Franklin and Garcia are lying."

Which witness is telling the truth?

A. Franklin

B. Garcia

C. Hayes

D. Each possibility is consistent

E. No assignment satisfies the constraint

25. "If the system is functioning normally, then no alert is raised." On shift 3 an alert WAS raised. Which conclusion MUST follow?

A. The system is functioning normally.

B. The system is NOT functioning normally.

C. The alert was raised in error.

D. The system is running a scheduled test.

E. Nothing about system functionality can be concluded.

26. "If the motion sensor is triggered AND the perimeter door is unlocked, the alarm sounds." During incident #902, the alarm did NOT sound AND the perimeter door was confirmed UNLOCKED. Which conclusion MUST follow?

A. The motion sensor was triggered.

B. The motion sensor was NOT triggered.

C. The door was not actually unlocked.

D. The alarm system failed.

E. Both the sensor and the door failed.

27. 60% of agents in a field office are deployed overseas. Of overseas agents, 30% are Arabic speakers. Of domestic agents, 15% are Arabic speakers. Given that a randomly selected agent from the office IS an Arabic speaker, what is the probability that agent is deployed overseas? (Round to the nearest whole percent.)

A. 18%

B. 30%

C. 60%

D. 75%

E. 90%

28. "All Level 5 operatives carry encrypted radios." Agent Woods is NOT a Level 5 operative. Which conclusion MUST follow?

A. Agent Woods does not carry an encrypted radio.

B. Agent Woods carries an encrypted radio.

C. Agent Woods is an intelligence analyst.

D. Nothing about Agent Woods's radio can be concluded.

E. Only Level 5 operatives carry encrypted radios.

29. A protective detail covers four sequenced events on a single day. Facts:

- Event A occurs at 10:00.
- Event B occurs exactly two hours after Event A.
- Event D occurs at 15:00.
- Event C occurs exactly one hour before Event D.
- Event C occurs AFTER Event B.

At what time does Event C occur?

A. 11:00

B. 12:00

C. 13:00

D. 14:00

E. Cannot determine without more information.

30. Consider three self-referential statements:

- S1: "S3 is true."
- S2: "S1 is false."
- S3: "S1 and S2 cannot both be true."

Which assignment of truth values is CONSISTENT?

A. S1 = true, S2 = true, S3 = true

B. S1 = true, S2 = false, S3 = true

C. S1 = false, S2 = true, S3 = true

D. S1 = false, S2 = false, S3 = false

E. No assignment is consistent

Finished? The answer key and explanations live in a separate document: [answer-key-test-07.html](#). Review every miss AND every correct guess. Score 23 or higher and you are ready for Pearson VUE.
