

EMMANUEL TIGOUÉ, CISSP

AI Security Engineer | Security Engineering & Agentic Systems
Atlanta, GA | 4048392214 | etigoue@tigouetheory.com | [LinkedIn](#) | [GitHub](#) | [Portfolio](#)

CERTIFICATIONS

CISSP | SecurityX | CCNA | Security+ | AWS Security Specialty (in progress) | Eligible for Security Clearance

EXPERIENCE

AI Security Engineer | CoreDirective
Atlanta, GA | Sep 2025 - Present

- Established CoreDirective's AI security program from zero, owning MLSecOps, detection engineering, model supply chain, identity, and AI governance across the production stack.
- Architected Squire, an AI SOC analyst on LangGraph with human in loop approval gates. Cut Datadog alert triage **80 percent** via pgvector RAG, NeMo Guardrails with GLiNER PII redaction, and Langfuse tracing.
- Threat modeled the OpenClaw model gateway against **10** OWASP LLM and **14** MITRE ATLAS tactics for prompt injection, jailbreak, exfiltration, and model supply chain risk.
- Built an adversarial test suite against Squire and the OpenClaw MCP style skill catalog for prompt injection, jailbreak, exfiltration, excessive agency, and output leakage on tool using agents. Triaged **6** high and medium findings with CVSS scoring before launch.
- Secured the n8n agent platform with HashiCorp Vault secrets, function call validation, and least privilege tenant scopes across **14** tool calling workflows and **16** services (Claude, Ollama, OpenClaw). Reclaimed **12+ hours per week** of manual security ops.
- Anchored zero trust perimeter and runtime defense with Cloudflare WAF, mTLS access tunnels, and Falco eBPF runtime detection mapped to MITRE ATT&CK container tactics. Cut Datadog alerts from **200+ to 12** daily through detection tuning.
- Embedded SAST, SCA, secrets, and IaC scanning into the SDLC with Semgrep, Trivy, Gitleaks, OPA Conftest, Cosign signing, and Syft SBOMs. Added OWASP ZAP DAST against staging and blocked unsigned container images at the registry.
- Codified **30+** AWS, DigitalOcean, and Cloudflare resources across **20** Terraform files with **8** OPA / Rego gates enforcing KMS encryption, key rotation, IAM least privilege, tagging, secrets handling, and zero public ingress.
- Eliminated standing admin with Teleport JIT PAM and Keycloak SSO RBAC. Enforced MFA on admin paths, recorded every session for audit, and cut breach blast radius.
- Authored **57** GRC documents covering NIST 800-53 (**135** controls), HIPAA, SOC 2, ISO 27001, NIST AI RMF, ISO 42001, FedRAMP moderate, and **5** IR playbooks including AI Incident Response. Ran Promptfoo continuous adversarial testing of guardrails.

IT Security & Operations Manager | Texaco
Atlanta, GA | Mar 2022 - Mar 2026

- Ran incident response for **3** retail locations. Investigated POS skimmer attempts using Wireshark, tracked credential compromises, and dealt with unauthorized vendor access.
- Wrote an IR runbook with **6** steps that dropped containment time from **8 hours to 90 minutes**.
- Deployed Splunk as the SIEM, pulling logs from every endpoint and network device on site. Built correlation rules and response automations that cut detection time from **48 hours to under 4**.
- Owned PCI DSS audits and risk based vulnerability management for **45+** endpoints with Nessus authenticated scans, partnering with the payment processor.
- Automated patch deployment, user provisioning, and compliance reporting via Python, PowerShell, and REST APIs. Reclaimed **12 hours weekly**.

TECHNICAL SKILLS

Technical Skills: Tenant isolation, Autonomy red-teaming, Output and tool-call validation, Data exfiltration controls, TypeScript, Adversarial ML, Vertex AI, Amazon Bedrock, Confidential Computing

EDUCATION

Georgia State University, Andrew Young School of Policy Studies
B.A. in Economics | 3.7 | 2026
A.S. in Business Administration | Dean's List | 2025
